

Do you even know
what's what
anymore?

First this way,
then that way.

Expect nothing,
be prepared for
anything.

Do nothing. It
is easier that
way, but then
you're not going
to get anywhere.

Just keep
reading.
Eventually
you will
get there.

Forwards or
backwards, it
may or may
not matter.

Do you
have an
idea in
mind already?

How did it get
this way? Can
you even know?

Now what?

Shouldn't
you?

???

Sometimes you will find that when things are
easy to understand, you will just carry on as
if on autopilot. You won't even need to think
much, let alone actually notice anything.

By now, you
really should
have a clue.

Sometimes it is
good to know
what to expect
before you
begin.

Then you can
make plans,
and set goals.

You can cope
with the
unexpected.

What if nothing goes according to plan?

What if the rules change?

What if Everything is straightforward and smooth sailing?

Wouldn't that be dull? Or is it comfortable sailing?

It would be strange and disconcerting if the rules were to change while you were engaged in an activity. At first, you might not even notice.

It wasn't meant to go quite like this, but it might work anyway. Try it. *Kitchchen-Tumbler.com*

IT ALL STARTS HERE

Keep going. You're doing just fine!

What is really going on, though?

By now you know things are not what you thought.

That's just how it is. But is that how it always was?

Everything seems according to plan.

At first you won't notice that anything is different.

Perhaps you think you should read this page first.

Maybe this is where you begin?
